

TUFAN KAR

Senior DevOps & Cloud Engineer | AWS | Azure | Kubernetes | SRE

Kolkata, India • tufankar345@gmail.com • +91-8444977112 • linkedin.com/in/tufankar

Available for Remote Full-Time Roles & Freelance/Contract Engagements (US & Global Time Zones)

PROFESSIONAL SUMMARY

Senior DevOps, Cloud, and Site Reliability Engineer with 11+ years of experience building and operating secure, scalable, highly available AWS and Azure infrastructure across fintech, healthcare, and enterprise environments. Strong background in Azure-to-AWS migration, application modernization, Kubernetes, Docker, Terraform, CI/CD, observability, Linux administration, networking, and SRE operations. Experienced in AWS-native service integration, container migration, migration-wave execution, regression/UAT support, cross-functional troubleshooting, automation, disaster recovery, documentation, and knowledge transfer. Proven track record maintaining 99.9% uptime, reducing MTTR by 40%, and cutting manual provisioning effort by 75%.

CORE COMPETENCIES

- AWS & Azure Cloud Architecture • Azure-to-AWS Migration • Application Modernization
- DynamoDB • AWS SDK • Kinesis • ElastiCache / Redis • DAX
- ECR • ECS/Fargate • Lambda • EKS • S3 • RDS • CloudFront • IAM • VPC
- Kubernetes • Docker • Terraform • CloudFormation • Ansible • Helm • ArgoCD • GitOps
- CI/CD • Jenkins • GitLab CI • GitHub Actions • CloudWatch • Prometheus • Grafana
- Regression / UAT • Migration Waves • Incident Response • SRE • Technical Documentation & KT

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, VPC, IAM, Lambda, S3, RDS, CloudFront, EKS, DynamoDB, Kinesis, ECR, ECS/Fargate, ElastiCache, DAX) | Microsoft Azure (AKS, Azure DevOps)

Application Modernization: Azure-to-AWS service refactoring, Cosmos DB-to-DynamoDB migration patterns, Event Hub-to-Kinesis replacement, caching modernization, AWS SDK/service integration, service discovery, configuration and secrets migration

DevOps & CI/CD: Terraform, Ansible, Docker, Kubernetes, Helm, ArgoCD, Jenkins, GitLab CI, GitHub Actions, CloudFormation, Git

Monitoring & Observability: CloudWatch, Grafana, Loki, Prometheus, Zabbix

Infrastructure & Systems: Linux Administration, Active Directory, Azure AD/Entra ID, Microsoft Intune/MDM, VPC/network architecture

Programming & Scripting: Python, PowerShell, Bash/Shell

PROFESSIONAL EXPERIENCE

Freelance DevOps & Cloud Engineering - Consultant

Independent Contractor | Remote, US Clients | Dec 2025 - Present

- Architect and deploy secure, auto-scaling cloud infrastructure on AWS and Azure for fintech and SaaS clients, containerizing applications with Docker and orchestrating production workloads on Kubernetes.
- Lead Azure-to-AWS migration and application modernization activities, aligning application components with AWS-native services, deployment patterns, and operational requirements.
- Implement application code refactoring for cloud migration, including Azure service replacement patterns, AWS SDK/client swaps, data-access modernization, event-streaming replacements, and caching strategy updates.
- Implement Cosmos DB-to-DynamoDB migration patterns at the application/table level, including SDK/client replacement, dual-read validation, TTL-assisted transition patterns, and hard cutover approaches based on workload requirements.
- Replace Azure Event Hub integrations with Amazon Kinesis eventing patterns, updating producers, consumers, AWS SDK calls, error handling, and operational validation.
- Evaluate Redis caching replacement approaches and integrate Amazon ElastiCache and DynamoDB Accelerator (DAX) where appropriate for application workload and performance requirements.
- Migrate service discovery, application configuration, and secrets-management patterns toward AWS-native deployment and operational practices.
- Support container migration, image registry updates with Amazon ECR, and workload deployment using ECS/Fargate, EKS, or Lambda according to target architecture.
- Apply, test, and validate AWS SDK/service calls against agreed Good/Better/Best modernization classifications at application and service level.
- Support per-service and cross-application regression, UAT, performance validation, and phased migration waves; collaborate with App SMEs, QA, and Performance Engineers to resolve defects and failed tests.
- Create and maintain migration runbooks, architecture notes, deployment procedures, troubleshooting guides, and knowledge-transfer documentation.

- Build CI/CD pipelines using Jenkins, GitHub Actions, and GitLab CI; implement Infrastructure as Code with Terraform and Ansible; establish monitoring and logging with Prometheus and Grafana.

Technical Team Lead - DevOps & Cloud Infrastructure

Infotek Services | Kolkata, India | Sep 2023 - Nov 2025

- Led multi-cloud infrastructure across Azure and AWS supporting 200+ virtual machines while maintaining a 99.9% uptime SLA.
- Engineered PowerShell automation that cut manual provisioning time by 75% and eliminated configuration drift.
- Designed disaster recovery strategies that achieved zero data loss across four critical incidents.
- Reduced MTTR by 40% through automated alerting, runbooks, and cross-functional collaboration with the GNOC team.
- Led security remediation efforts, resolving 95% of P1/P2 vulnerabilities within a 48-hour SLA and achieved 100% compliance in external SGS security audits.

DevOps Engineer

SBR Technologies Pvt. Ltd. | India | Mar 2023 - Sep 2023

- Architected a full cloud migration to AWS for a healthcare platform serving 50,000+ users.
- Deployed Infrastructure as Code via Terraform, managing 30+ AWS resources through version-controlled pipelines.
- Delivered a 60% improvement in global page-load times using an S3/CloudFront frontend.
- Built observability tooling with Zabbix and Grafana, automating alerts across 15+ critical metrics.
- Integrated ClamAV real-time malware scanning to protect sensitive patient data.

Senior Security Engineer

INYT Technologies Pvt. Ltd. | Kolkata, India | Nov 2021 - Mar 2023

- Reduced breach impact by 65% through malware analysis and incident response using Rapid7 SIEM and Microsoft 365 Defender.
- Developed custom detection rules that improved threat identification accuracy by 45%.
- Secured 5,000+ endpoints against phishing and spam through enterprise-wide policy hardening.
- Deployed Web Application Firewall solutions blocking 200+ attack attempts monthly.

Information Security Analyst

Prudential Infotech Ltd. | India | Jun 2016 - Nov 2021

- Implemented security frameworks and conducted VAPT engagements, identifying and remediating critical vulnerabilities pre-exploitation.
- Secured sensitive financial data through enterprise firewall and encryption deployments.
- Performed penetration testing and simulated cyber-attacks across client infrastructure.
- Conducted Active Directory security audits and GPO hardening across multi-site environments.

SELECTED PROJECTS

Azure-to-AWS Application Modernization: Refactored Azure-dependent application integrations for AWS modernization, covering Cosmos DB-to-DynamoDB data-access patterns, Event Hub-to-Kinesis eventing, Redis/ElastiCache/DAX caching evaluation, AWS-native configuration/secrets patterns, ECR container workflows, ECS/Fargate/Lambda deployment, SDK validation, migration waves, UAT/regression support, and technical knowledge transfer.

NRTax - US Fintech Platform: Designed secure, auto-scaling AWS infrastructure with internal load balancing to isolate the business logic layer.

MOM Healthcare - AWS Migration: Led a complete cloud rebuild with S3/CloudFront frontend, RDS backend, and Terraform IaC for a platform serving 50,000+ users.

Education Microservices Platform: Built an OpenShift-on-EKS solution with multi-environment CI/CD pipelines, Harbor registry, and Grafana Loki observability.

Roche Property Management: Executed a lift-and-shift migration from on-prem OpenShift to AWS EKS using DMS and CodePipeline with zero-downtime cutover.

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate
- AWS Certified DevOps Engineer - Professional
- Microsoft Certified: Azure Administrator Associate
- Microsoft Certified Solutions Associate: Linux on Azure
- Red Hat Certified System Administrator (RHCSA)

EDUCATION

Bachelor's Degree, English Language & Literature - University of Burdwan (2007-2010)
