

TUFAN KAR

Senior DevOps & Cloud Engineer

Kolkata, India | tufankar345@gmail.com | +91-8444977112 | linkedin.com/in/tufankar

Available for Remote Full-Time Roles & Freelance/Contract Engagements (US & Global Time Zones)

PROFESSIONAL SUMMARY

Senior DevOps and Cloud Engineer with 11+ years of experience building and operating secure, scalable, highly available infrastructure on AWS and Azure for fintech, healthcare, and enterprise environments. Skilled in Kubernetes, Infrastructure as Code (Terraform, CloudFormation), CI/CD pipeline design, and observability. Proven track record maintaining 99.9% uptime across 500+ user environments, reducing mean time to resolution (MTTR) by 40%, and cutting manual provisioning time by 75% through automation. AWS Certified Solutions Architect and DevOps Engineer Professional, Azure Administrator Associate, and Certified Ethical Hacker, bringing a strong security-first approach to cloud and DevOps engineering. NASA Hall of Fame honouree for independent security research. Currently consulting independently for US-based clients and open to full-time remote roles or long-term contract engagements.

CORE COMPETENCIES

- **Cloud Architecture:** AWS and Azure infrastructure design, multi-cloud environments, high-availability and autoscaling systems
- **DevOps & Automation:** CI/CD pipeline design, Infrastructure as Code (Terraform), configuration management, PowerShell/Python/Bash scripting
- **Container Orchestration:** Kubernetes, AKS, Docker, Harbor Registry, microservices deployment
- **Observability & Monitoring:** Prometheus, Grafana, Grafana Loki, Zabbix, CloudWatch, SIEM-driven monitoring
- **Security & Compliance:** Zero-trust architecture, VAPT, ISO 27001, DLP policy, Conditional Access governance, incident response
- **Identity & Systems Administration:** Hybrid Azure AD (Entra ID), Microsoft Intune, identity lifecycle management, Active Directory

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (Solutions Architect Associate, DevOps Engineer Professional), Microsoft Azure (Administrator Associate)
- **DevOps & CI/CD:** Terraform, Ansible, Docker, Kubernetes, AKS, Jenkins, GitLab CI, GitHub Actions, CloudFormation, Git
- **Monitoring & Observability:** CloudWatch, Grafana, Grafana Loki, Prometheus, Zabbix
- **Security Tools:** Rapid7 SIEM, Microsoft 365 Defender, Web Application Firewall, ClamAV/EDR, VAPT/Penetration Testing
- **Infrastructure & Systems:** Active Directory, Azure AD (Entra ID), Microsoft Intune/MDM, VMware vSphere/ESXi, Veeam Backup & DR, Cisco Meraki/VPN, GPO Hardening, Hybrid Identity Management
- **Programming & Scripting:** Python, PowerShell, Bash/Shell
- **Certifications & Standards:** CEH Master, CompTIA PenTest+, ISO 27001 Lead Auditor

PROFESSIONAL EXPERIENCE

Freelance DevOps & Cloud Engineering Consultant

Dec 2025 – Present

Independent Contractor — Remote, US Clients

- Architect and deploy secure, auto-scaling cloud infrastructure on AWS and Azure for fintech and SaaS clients, containerizing applications with Docker and orchestrating production workloads on Kubernetes.
- Design and build CI/CD pipelines using Jenkins, GitHub Actions, and GitLab CI to automate build, test, and deployment workflows, shortening client release cycles and reducing deployment errors.
- Implement Infrastructure as Code with Terraform and Ansible to automate provisioning and configuration management, eliminating manual setup and configuration drift across client environments.
- Stand up monitoring and logging stacks with Prometheus and Grafana, delivering real-time visibility into system health, performance, and cost across multi-cloud infrastructure.
- Perform Linux administration and Python/Bash scripting to automate operational tasks, streamline infrastructure management, and support incident response.
- Lead cloud migration and automation projects for startup and mid-market clients, delivering measurable improvements in performance, scalability, and cloud cost efficiency.

- Conduct cloud security assessments, including VAPT engagements and Microsoft 365 security reviews, producing executive-ready remediation reports.
- Structure engagements as short-term projects, long-term retainers, or fixed-scope contracts across US time zones.

Technical Team Lead — DevOps & Cloud Infrastructure

Sep 2023 – Nov 2025

Infotek Services | Kolkata, India

- Led multi-cloud infrastructure (Azure and AWS) supporting 200+ virtual machines while maintaining a 99.9% uptime SLA.
- Engineered PowerShell automation that cut manual provisioning time by 75% and eliminated configuration drift.
- Designed disaster recovery strategies that achieved zero data loss across 4 critical incidents.
- Reduced mean time to resolution (MTTR) by 40% through automated alerting, runbooks, and cross-functional collaboration with the GNOC team.
- Led security remediation efforts, resolving 95% of P1/P2 vulnerabilities within a 48-hour SLA.
- Achieved 100% compliance in external SGS security audits.

DevOps Engineer

Mar 2023 – Sep 2023

SBR Technologies Pvt. Ltd. | India

- Architected a full cloud migration to AWS for a healthcare platform serving 50,000+ users.
- Deployed Infrastructure as Code via Terraform, managing 30+ AWS resources through version-controlled pipelines.
- Delivered a 60% improvement in global page load times using an S3/CloudFront frontend.
- Built observability tooling with Zabbix and Grafana, automating alerts across 15+ critical metrics.
- Integrated ClamAV real-time malware scanning to protect sensitive patient data.

Senior Security Engineer

Nov 2021 – Mar 2023

INYT Technologies Pvt. Ltd. | Kolkata, India

- Reduced breach impact by 65% through malware analysis and incident response using Rapid7 SIEM and Microsoft 365 Defender.
- Developed custom detection rules that improved threat identification accuracy by 45%.
- Secured 5,000+ endpoints against phishing and spam through enterprise-wide policy hardening.
- Deployed Web Application Firewall solutions blocking 200+ attack attempts monthly.

Information Security Analyst

Jun 2016 – Nov 2021

Prudential Infotech Ltd. | India

- Implemented security frameworks and conducted VAPT engagements, identifying and remediating critical vulnerabilities pre-exploitation.
- Secured sensitive financial data through enterprise firewall and encryption deployments.
- Performed penetration testing and simulated cyber-attacks across client infrastructure.
- Conducted Active Directory security audits and GPO hardening across multi-site environments.

KEY PROJECTS

- **NRTax — US Fintech Platform:** Designed secure, auto-scaling AWS infrastructure with internal load balancing to isolate the business logic layer.
- **MOM Healthcare — AWS Migration:** Led a complete cloud rebuild with S3/CloudFront frontend, RDS backend, and Terraform IaC for a platform serving 50,000+ users.
- **Education Microservices Platform:** Built an OpenShift-on-EKS solution with multi-environment CI/CD pipelines, Harbor registry, and Grafana Loki observability.
- **Roche Property Management:** Executed a lift-and-shift migration from on-prem OpenShift to AWS EKS using DMS and CodePipeline with zero-downtime cutover.

CERTIFICATIONS & RECOGNITION

- AWS Certified Solutions Architect – Associate
- AWS Certified DevOps Engineer – Professional
- Microsoft Certified: Azure Administrator Associate
- Certified Ethical Hacker (CEH Master)
- CompTIA PenTest+

- ISO 27001 Lead Auditor
- Red Hat Certified System Administrator (RHCSA)
- NASA Hall of Fame — Security Research Honoree

EDUCATION

Bachelor's Degree, English Language & Literature — University of Burdwan (2007 – 2010)
